a strong presence **across the globe.**

SETTING BENCHMARKS

THROUGH STRATEGIC EXPERTISE

WHAT WE DO?

SVR Industries brings the world of paper to your doorstep, literally. With over a decade of global experience under our belt, we are geared to provide prompt and efficient service to customers in the supply of finished, recycled and waste paper. What makes us unique in the cluttered and competitive paper value-chain is our presence in over 20 countries, supported by an agile and experienced team of professionals that brings with it a deep understanding of the paper industry. Club this with our client-centric approach and you have a world-class business that caters to your exact needs - promptly and efficiently.

Your requirement for all types of finished paper ends with SVR Industries. Be it in reel or sheet form, we can supply all grades and grammage in desired quantities and at globally competitive price-points. Supporting this entire operation is our strong logistics backbone, so meeting timelines is not an issue. Every successful enterprise is built brick-by-brick on support systems that eventually become pillars of the organization.

Today SVR Industries trades in approximately 40,000 tons of paper per month! The SVR Industry business is broadly categorized under two divisions Finished Paper and Recycled Paper. Safeguarding the environment is now a major focus area which is why recycled

FINISHED PAPER

SVR Industries has built a robust supply chain comprising paper mills within India and overseas, which places the company in an enviable position of supplying all grades and qualities of finished paper in reel and sheet form, customized to consumer needs. The finished paper is exported to more than 10 countries.

FINISHED PAPER

The company has established a sustainable network of suppliers worldwide for purchase of all grades of waste papers, which is in turn supplied to paper mills for purposes of recycling.

VARIOUS GRADES

KRAFT PAPER

- Fluting (50-200 gsm)
- Test Liner (100-200 gsm)
- Kraft Liner (80-250 gsm)
- Core Board (PB 250-PB 600)
- White Top Kraft Liner (180-550 gsm)
- Virgin Kraft Liner (180-350 gsm)

DUPLEX BOARD (HWC & LWC)

- Grey back (210 - 450 gsm)
- White Back (210 - 450 gsm)

MG POSTER PAPER

- Both Virgin & Recycled (30-180 gsm)

MG TISSUE

- Both Virgin & Recycled (18-80 gsm)

ENVELOPE PAPER (40 - 200 GSM)

- Ribbed Paper
- Colored Envelop Paper
- Manilla Paper

WRITING PRINTING & MAPLITHO

- 50 Gsm & above upto 95% brightness

NEWSPRINT

- Both Virgin and Recycled

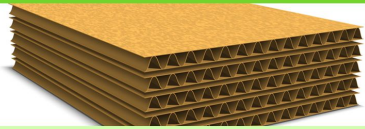

RECYCLED SOFT TISSUE

PACKAGING AND LAMINATION PAPERS

- Food Bags
- Carry Bags

THE PRODUCT WE SPECIALISE

FLUTING PAPER (50-200 GSM)

Fluting paper is sized and then used to make corrugated board, which is then converted into boxes. The corrugated board consists of an outer liner paper and an inner liner paper, with fluting paper in the middle.

Being an environmental friendly alternative to traditional packaging materials such as bubble wrap and other plastic based solutions, it is 100% recyclable and made from a renewable resource. Different weighted paper available for different strength requirements.

Application:

Food Packaging | Packaging for Consumer Durables | Corrugated Cardboard Tray Packaging

PACKAGING & FOOD GRADE PAPER (40 - 200 GSM)

Glazed kraft paper with clean & smooth surface used for varied industries like food packaging and other industries.

100% FDA approved and made from virgin/ recycled fibre.

Application:

Food Packaging | Bakery Bags | Carry Bags | Gift Wrapping

www.srvpapers.com

TEST LINER PAPER (100 - 250 GSM)

Testliner is used in corrugated boards as the top and bottom layers. Testliner is made from 100% recycled fibres and coloured agents give it a stable optical colour. Addition of starch guarantees the strength of Testliner and a surface treatment, involving the addition of synthetic adhesives optimizing the printability of paper.

Application:

Food Packaging | Packaging for Consumer Durables | Corrugated Cardboard Tray Packaging

DUPLEX GREY BACK AND WHITE BACK (200-410 GSM)

Duplex board (also called as white corrugated boxes) mainly consists of two layers with smooth surface and widely used for packaging purposes. We offer all types of Duplex board viz. HWC (High Weight Coating) and LWC (Light Weight Coating) with Grey back. It is a strong board and good for printing on and widely used for food packaging. Industries: Packaging and printing Suitable for high quality embossing, foil stamping.

Application:

Match boxes | Pharmaceuticals | Liquor cartons
Garment boxes | Sweet boxes

NEWSPRINT PAPER (100-250 GSM)

Wood based paper made from 100% recycled pulp (deinked) having high bulk and good smoothness. It is suitable for high speed printing commonly used for newspaper and advertising material. Brightness: 58%

Application:

Newspaper Publications and Advertising materials

WRITING, PRINTING & MAPLITHO PAPER (50-110 GSM)

Writing Printing paper is smooth surface sized paper which is produced from high bright pulp. It has high tensile strength and suitable for high speed multi color printing. We have wide range of writing printing grades starting from 50 gsm to 110 gsm having brightness from 80% to 95%. Writing paper is offered both in reels and highly professional automated ream packing.

Application:

Printing Books & Notebooks | High Quality Diaries | Computer Stationary | Invoices Cashbooks | Calendars and Writing Pads

MG POSTER/TISSUE PAPER (18 - 160 GSM)

We supply both virgin and recycled grades of MG poster & tissue with high burst factor. We have both White and Coloured Poster paper available in both reel and sheet form. We also do customized packaging based on customers requirement with branded and white label solution. Ream packing is available in paper and poly printed cover. FDA Approved

Application:

Paper Straws | Fruit Wrapping | Soap Wrappers | Sandwich Wrapping

ENVELOPE PAPER (40 - 160 GSM)

Catering to wide range of envelope papers ranging from colored paper to manila kraft paper. The wide range of envelope paper is made from 100% recycled fibre and is commonly used for all types envelopes such as normal envelopes, golden manila envelopes and padded envelopes that ensures cushion for shipping needs.

Application:

Envelopes | Manila Envelopes | Mailing Envelopes

RECYCLED PULP

Recycled Pulp is made out of waste paper. Waste paper is processed through a paper making machine without using any kind of chemicals and sizing equipments.

WASTE PAPER

The company has established a sustainable network of suppliers worldwide for purchase of all grades of waste paper, which is in turn supplied to paper mills for purpose of recycling.

OUR SERVICES

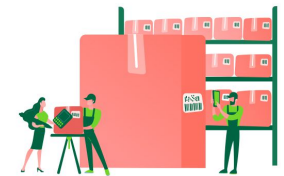

LOGISTICS

Our key is promptness and quick delivery. We assure the best logistics and not only keep our clients updated about their shipment status but track them ourselves for their assurance.

PACKAGING

We supply finished paper, both in reels and sheets based on customized requirement of customer. Our packing services provide complete safety of consignment during the transit period.

QUALITY ASSURANCE

We Continuously strive to meet the increasing customer demands by providing highest customer experience and service levels.
